The amendment received 2/9/06 has been entered and claims 123-128 are currently pending in this application. The amended title is acceptable.

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The specification as originally filed does not contain written description for a kit.

Applicant's arguments filed 2/9/06 have been fully considered but they are not persuasive.

Applicant argues that the parent issued patent provides enablement for a kit and the parent patent has been incorporated by reference.

It is the examiner's position that Applicant has not pointed out precisely where in the printed patent enablement is found for the present claims. The present specification does not provide written description for the claims as presented which is required, see MPEP 608.01(p). Note no new material may be added.

The present application is a CIP of the parent patent and the present specification does not contain essential material. Therefore this essential material must have been deleted from the specification.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
